**Subject:** AES - PR Senate Hearings

Betsy,

As we've discussed with Greg Helms, our RA has requested that we provide a EPA representative to speak with a Puerto Rico Senator about the LEAF test and the AES Agremax results, in the context of their ongoing hearings over the use of Agremax, and we have determined that Greg would be the most appropriate. Three bills are now before the PR Senate, which propose prohibition of Agremax use or management controls. Please let us know if this would be acceptable to you. Greg's responses to the Senator's questions would be limited to the LEAF and TCLP tests, and would not encompass our ongoing RCRA 7003 action, the discussion of which is prohibited by EPA's third party communication policy, nor would Greg be asked to speak to any question of potential harm. A Region 2 ORC attorney would be on the call with Greg.

Given that the hearings seem to be ongoing, we anticipate that Greg may be asked to speak to the Senator soon. We will provide a translator if needed.

Thank you for your and Greg's support.

George
